The Watching Environment: Solar Variability as an Input to the Earth's Environment, ESA SP-535, p. 252

Spectral Irradiance variations:
- The spectral irradiance variations are well identified processes for changes in stratospheric ozone and tropospheric ozone.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
- The spectral irradiance variations are well explained by effect of sunspots + faculae.
